## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-29, drawn to an apparatus for conditioning mammalian blood with an input system, output system, control system, and stressors, classified in class 604, subclass 4.01.
  - II. Claims 30-48, drawn to a cabinet for use in conditioning mammalian blood with a door, lock, cavity, and control system, classified in class 422, subclass 44.
  - III. Claims 49-67, drawn to a flask assembly for use in a blood conditioning apparatus, classified in class 604, subclass 6.15.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in all three groups are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility. The Group I apparatus does not require a locking mechanism, and may be used in procedures that require the addition of chemicals or other treatment of the blood during the stressor period. The Group II cabinet does not require the input and output of the system of Group I, and may be used as an autoclave chamber. The flask assembly of Group III requires none of the particulars of Group I or Group II, and may be deployed, for example, as a standalone oxygenator. See MPEP § 806.05(d).

Art Unit: 3761

3. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Matthew Schneider on 27 September 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie R. Deak whose telephone number is 571-272-4943. The examiner can normally be reached on M-F 7:30-5:00, every other Friday off.
